

Certikin
brings water to life

Swimming Pool Lining

SWIMMING POOL LINING

Certikin offers a wide choice of colours and patterns, from the world's leading vinyl manufacturers, combined with the highest quality manufacturing techniques. Certikin swimming pool liners are the best possible option to bring your pool to life.

With a pattern and colour range which continues to provide the traditional options but also challenge the 'norm', we offer a wider choice than ever before to liven up almost any pool. In-house state of the art design and cutting procedures ensure even the most complex shapes and sizes can be recreated.

Our pool vinyls are sourced from the world's leading vinyl manufacturers: Canadian General Tower, Elbtal Plastics and Renolit, all of whom create materials to exacting standards and have a combined manufacturing experience of over 160 years. This range of supply allows Certikin to have the widest choice of patterns and colours available in the UK market, including many exclusive designs, without compromising quality.

Modern design and manufacture techniques allow us to take these excellent materials and create a high quality liner for almost any size or shape of pool, including those with features such as ledges, freeform curves, cover pits and integral steps.

As such, all of the liners Certikin manufacture, offer the following qualities and features:

- Lacquered surfaces over high quality prints to help guard against abrasion, staining and UV attack.
- Inclusion of anti-microbial bodies to help combat biological attack and marking.
- High levels of flexibility.
- High resistance to breaking, tearing and puncturing.
- Resistance to water temperatures up to 30degC.
- Resistance to pool chemicals in a balanced water environment.
- Manufactured in a clean, purposely equipped factory environment incorporating trained staff and cutting and welding machinery specifically designed for the manufacture of pool liners.
- 10 year pro rata guarantee

**10 YEAR
GUARANTEE**

Images are used as a guideline only. Scale, sizing, shade and positioning of patterns may vary. Pattern match at point of seams cannot be guaranteed.

SMOOTH-SEAM:

Our unique soft-bar welding technique has been improved in order to offer the most aesthetic seam possible. Traditional welding techniques use a harsh brass welding electrode to create the vinyl seam, this can result in a very pronounced and hard seam which can catch on the feet and be a dirt trap. Certikin's 'smooth-seam' allows the vinyl edges to be softened into one another, thus creating a flatter, smoother and better looking liner, without compromising quality. **NOTE:** The 'smooth-seam' process is designed as an aesthetic improvement, it is not designed to make seams disappear or for patterns at seams to match - aesthetic quality is not regarded as a guarantee issue.

SAMPLES - Free to good home!

In many instances, the impression seen of our pattern range in this price list just can't do the actual vinyl justice. The best way to establish how the pool will eventually look is to view the vinyl by browsing through one of our sample folders or retail hanging displays. All of our samples are provided free of charge and we would be pleased to supply one-off samples of a particular combination of vinyls if required. To find out more, or to request samples (including cover samples) please contact us.

Equipped To Supply

In addition to having depth of experience in production operatives, Certikin has continually invested in the most current equipment in order to improve efficiency, accuracy and quality. The purpose equipped liner manufacturing facility in Leeds boasts customised CAD software packages, purpose made high frequency welding equipment, automated beading application and a fully integrated material handling and dispensing carousel and automated cutting table.

Contemporary Printed Tile Band Options

Certikin's range of contemporary, pre-printed, tile band liners offer a wide range of options, opening a new avenue of colours and designs which can contrast greatly from the commonly seen traditional ranges. Liners are manufactured from a pre-determined wall section with a pre-printed tile band and a complementing lower wall/floor section which is the same pattern as the main body of the wall – offering a stunning all over effect. It is also possible to cross match the printed tile band onto other background patterns if desired – please enquire about additional charges for this process.

It should be noted that a background print or colour is visible above the printed tile band – please ask for a full size sample of the product if this is a concern.

Factory Made Swimming Pool Liners

As the general ability to manufacture pool liners improves, it has become possible to fabricate more complex shapes and features into a single piece 'bag' liner. Curves and banks are common within pools, and as the popularity of slatted covers increases, pools which require ledges and pits to accommodate these are also being seen more and more. Liners can comfortably be manufactured to follow all of these shapes and features.

In addition, Certikin liners can now be fabricated to neatly follow the profile of a variety of internal and external pool steps, whether curved or straight. We require 100% accurate and detailed dimensions, but on supply of such the manufacture of almost any style or position of step is possible.

Steps will be formed in numerous ways depending on their style and can be of a single piece of vinyl which flows from the floor up the steps to the pool wall, or from multiple sections welded together to form the individual planes of each tread and riser. Liner steps can be formed using any patterned or plain colour but consideration should be given to how a shaped feature will appear – for example forming a mosaic liner over curved or angled steps can lead to the natural flow of the mosaic being compromised. Equally, steps with particularly tight angles and dimensions often need multiple, close range, welds – these can be emphasised if made in plain coloured liners. The overall best effect is seen in mid and pale coloured random pattern material.

Installation of the step is equally critical – the step should be positioned first and held in place with weights so it cannot move out of place as the remainder of the liner is positioned and stretched. There should be a minimum of 6" (150mm) of water on the top step to minimise any possibility of liner slip. It should always be made aware to pool owners that the fit of the liner over the steps does not guarantee it will not move – only the water pressure holds the liner in place. Equally, all should be aware that the vinyl from which steps are manufactured is not designed as a non-slip material and great care is needed when using this product in the pool.

PoolMat - WSL

Simply the easiest way to decorate your pool! PoolMat is a high quality pool motif manufactured on heavy duty vinyl with UV and chemical resistant inks which simply sits on your pool floor.

No adhesives, no suction, no specialist fixing required. The PoolMat is held down by its own weight and the pool water. All you need to do is slide the mat into the water, position it where you want it and ensure there is no air or water trapped underneath. Literally installed in seconds into a full or partially full pool. Suitable for all smooth-surface pool types (not tiles) on a level surface.

If you want a change, simply lift the PoolMat and move it around the pool, or alternate with other PoolMats.

PoolMat comes in a range of pre-manufactured designs in a standard 59" (4' 11" / 1.5m) diameter.

Compass

Tropical Fish

Please note that Pool Mats are unsuitable for use on indoor pools.

INFINITE ON-SITE POOL LINING

15 YEAR
GUARANTEE

Infinite On-Site Lining

Certikin's Infinite On-Site Lining service continues to go from strength to strength, both in terms of level of service and installation ability to the depth of quality in the materials we use.

Now firmly established in this market, Certikin's ability to install a liner into almost any pool and any environment speaks for itself, with a very wide variety of installations successfully completed, from basic balance tanks, to standard and complex domestic pools through to full commercial size installations.

Our material range continues to advance and is of the highest quality. Our supply partners are some of the finest PVC manufacturers in the world and continue to excel themselves in terms of development and quality standards. All materials sourced are certified for use in domestic and commercial applications, being KSW and CE certified – they meet all current European requirements for swimming pool installation – and in particular, all of our anti-slip membranes, plain colour or printed, are manufactured to DIN EN 51097 Cat C standards.

The choice of colours and patterns includes all of the classics, but also includes new and adventurous options such as our exclusive Silver Black Tile, Royal Mosaic and Oceanstone. We have also developed our range of patterned anti-slip membranes so that our French Mosaic, Royal Mosaic, all three Cyrus Mosaics and our Oceanstone design, have a complementary and matching anti-slip membrane in order to offer an all over tiled effect finish.

Product Features:

- Installed by Certikin
- 15 year pro-rata guarantee at pool temps of up to 90°F (32°C).
- Fully certified materials – suitable for any installation.
- High quality printing with a multiple lacquered protective surface – offering the highest stain, discolouration and abrasion resistance.
- UV Stabilised – acceleration chamber tested.
- Ideal for both new and refurbished pools (including concrete, cement render, steel, aluminium, timber and fibreglass) – note: fittings must be liner fittings.
- 1.5mm or 1.6mm PVC with polyester internal mesh.
- Anti-slip PVC for steps and walk in slopes.
- Anti-microbially equipped.
- Tear resistant.
- Installed with 50mm overlap seams – sealed with colour co-ordinated or translucent liquid PVC.
- Anchor points made with stainless steel expanding drive rivets.
- Can be hung from standard liner-lock or from specifically installed metal profile.
- Geo-textile underlay available and recommended.
- Easily repairable if damaged.
- Suitable for domestic and commercial applications.

Plain Colours Options

Plain, solid colours are ideal for creating an all over crisp finish. They can be combined with patterns around the perimeter, walls and floor if desired to create contrast and differentiation. Whilst solid colours are clean and even, they can highlight unevenness in the pool shell in some instances.

Our extensive range of colours offers the widest choice and the highest quality. Our exclusive Marine Blue colour offers a pleasing variant to the traditional blues and greens, giving a unique look when under water. All plain colours, **with the exception of Marine Blue***, are available in matching anti-slip variants – these can be used to complement the all over colour of your liner, or mixed with patterns and other colours to create areas of contrast on step treads, slopes, ledges and other safety areas.

Our full range is available to view in our free of charge sample swatches. Please contact Certikin North for provision of these and other lining samples.

Touch Range (Special Order)

The Touch range of vinyl has been designed to offer a simulation of a variety of natural stone effects, both in appearance and texture. By combining high quality and thicker than standard (2.0mm as opposed to 1.5mm) vinyl with the latest design and manufacturing technology which incorporates printing, embossing and engraving, each of the unique designs offers both aesthetic beauty and a pleasant and surprising touch.

The texture of the Authentic, Relax and the new Vanity designs allows them to be certified as an anti-slip product to Cat C of the required DIN standard, and the Elegance design has its own complementary anti-slip option which also meets the standard. All Touch vinyls are ultimately protected by the Alkorplan 3000 multi-layer lacquering system for maximum protection within the pool environment.

Island Dreams - NEW

Inspired by the textures and stunning looks of some of the most beautiful beaches in the world. From the tranquil sands of Capri and Bali, to the darker tones of Hawaii and Tahiti. Designed with differing textures (which comply with all anti-slip standards) and carefully selected colouring, this pool lining system offers all the benefits of a traditional on-site lining installation with the addition of such a unique look. The vinyl is manufactured to full swimming pool grade standard and as such can be used in the same range of installation possibilities as any other on-site lining vinyl. The anti-slip nature of the Island Dreams range means that it can be used on all surfaces, including steps and slopes, and complementary liquid PVC is used for sealing each seam.

NEW

Ceramics By Renolit Alkorplan (Special Order)

Renolit Alkorplan Ceramics is a range of reinforced membrane with the appearance of ceramic mosaic, inspired by Greek mythology. Thicker than a traditional membrane in order to achieve the relief, Ceramics is one of most resistant, impermeable and lasting liners on the market.

Features

- Unique designs to give the look and feel of ceramic mosaic tiles
- All the usual benefits of standard on site lining vinyl
- Textures of each design comply with Cat C of the required DIN standard for anti-slip, meaning the vinyl can be used on all surfaces.

Selene

Silver-winged goddess of the moon: she captivated the hearts of the classic poets and now dazzles in the pool that have her. Selene, with a white lunar finish will captivate those who contemplate her celestial waters, clear as the sky on a summer's day.

Sofia

Goddess of wisdom and source of all knowledge: magical, poetic and mysterious. This salmon-toned lining is perhaps the most sophisticated, in a totally innovative colour in the swimming pool world, it offers a display of delicate turquoise blue in the water.

Etna

The Nymph that gave name to a volcano where the rays of Zeus, God of all the Gods, were forged. This lining is restrained and elegant, giving a spectacular and majestic finish.

Atenea

Goddess of reason and the protector of Athens, a city bathed in Mediterranean Sea in which this lining was inspired, an intense blue, so warm, so deep, so ours. Atenea gives the water an unequalled shine and subtlety.
