Safe and energy saving swimming pool cover

A safe living environment is priceless. Likewise, the safety in and around your swimming pool is of essential importance. With the integrated Aqua-deck® slatted cover you improve the safety for your children and pets. You want the best. Also in terms of comfort, energy savings, sustainability and appearance. With a full surface, perfectly fitting cover for your pool you create a secure ambiance in no time. A safe feeling.

The slatted cover is available in multiple colours, so it perfectly matches the style of your home and garden.

Enjoyment without worry

Besides keeping your swimming pool clean and reducing energy costs, an Aquadeck® provides something priceless: safety. With an Aquadeck® you can enjoy being outdoors with the entire family without worry. Pure class!

You'll find Aquadeck® has engineered a whole range of safety measures into its slatted system. The slats, for instance, have three compartments to increase their buoyancy. In addition, an Aquadeck® gives you the choice of mechanical or electrical opening and closing of the slatted cover. The installation of a handrail located just below the waterline creates even more safety.

Quality & Innovation

Aquadeck® has produced slatted cover systems for swimming pools since 1999. We carefully produce all our top-quality slatted covers in-house. Thanks to the use of high-quality materials and the extensive range of application possibilities, our products are becoming increasingly popular throughout Europe.

Through continuous investment in know-how and use of an advanced production process, Aquadeck® is able to guarantee consistent quality. Class deserves confidence and that's why our products are covered by a rock solid warranty. Our continuous pursuit of quality improvement through innovation has resulted in such advances as a powerful reel motor and the Aquadeck® impact-resistant polycarbonate slat with a demonstrably longer service life than, say, a PVC slat.

Dependable technological advances

The most state-of-the-art technologies and innovative materials ensure that your pool opens and closes completely automatically at the touch of a button. The latest reel motor, available as an option, makes the system even more user-friendly. As a result of the development of this super strong motor, it is now no longer necessary to make a motor well in the pool. This is beneficial both in terms of comfort and appearance.

An Aquadeck® is always made-to-measure, both in terms of shape and dimensions as well as type of installation. You can count on our enthusiastic assistance and expertise to help you pick the best custom solution. That, too, is what quality is all about. Enjoying a refreshing dive in your pool begins with dependable technological advances!

Our anti-algae swimming pool cover provides a solution for algae formation

The recent introduction of an innovative slot design in the anti-algae swimming pool cover results in flushing and flow within the slat, allowing the water disinfection to break down and carry off algae. During opening and closing the cover water flows through the slots, spiralling through the coupling chamber of the slat. The water loosens the contaminants and carries them away. A smart solution, based on self-cleansing functionality.

Made-to-measure design and quick turnaround times: the benefits of a strong company

It's only possible to make the final measurements when your swimming pool is almost or completely finished. With most manufacturers of pool covers, you then have to wait another five or six weeks. But not with Aquadeck®. Thanks to continuous innovation, we've developed exactly the right combination of technology and logistics. Aquadeck® is a family company that stands for excellent service and continuity in quality, made-to-measure solutions and quick turnaround times. Moreover, Aquadeck® is a member of Pollet Pool Group, a strong organization behind a strong brand.

The result: a perfectly made-to-measure result with a production time of around 14 working days. And you'll find that the price/quality ratio of an Aquadeck® swimming pool cover is also very attractive. So what should you focus on? Carefree enjoyment of the good things in life!
